

VoIP CloudConnect (VCCORE) for Android

Please note: After successfully installing the app you will need your **End User Portal** *username* and *password* to log into the app. If you do not have an End User Portal credentials, please [Here](#)

1. From your **Android device** go to the **Play Store** and install the *VoIP CloudConnect* mobile app.

2. Once installed please launch the application, this will take you to the login screen. You are a *VCCORE* application user so the syntax of the *Username* will include *@VCCORE*

Enter the same credentials you use to log into **End User Portal** but add *@ VCCORE* to the of the username, see screenshot below.
